

4. What is the maximum number of repo... ▼

Points: 0/0

4 What is the maximum number of reported measles cases in the entire data set?
. Hint: use `-t` option with `sort` to specify the delimiter.

✓ 13226 6 responses 0 / 0 pts

✗ 132226 1 response 0 / 0 pts

typo, 13226

✗ 300 1 response 0 / 0 pts

on the right track, try again

✗ 6952 2 responses 0 / 0 pts

this happened because tabs and spaces are recognized at column delimiters and "New York" wasn't read correctly

✗ 7,1941 1 response 0 / 0 pts

good try, but you're a little off

✗ `cut -d "," -f4 Dalziel2016_data.csv | sort -n | tail -1` 1 response 0 / 0 pts

that's the correct code

✗ `grep -i washington Dalziel2016_data.csv | cut -d "," -f 4 |
sort -n -r | head -n 1` 1 response 0 / 0 pts

you shouldn't use `grep` to obtain the answer

✕ `tail -n +2 Dalziel2016_data.csv | sort -t "," -k 4 -n -r | head -n 1` **1 response** 0 / 0 pts

see question: "What is the maximum number of reported measles cases in the entire data set?"

✕ No answer provided. **3 responses** 0 / 0 pts
