| congrats if you got this on the first try! |

✕   10   **1 response**   0   / 0 pts

| on the right track, try it again |

✕   1118   **1 response**   0   / 0 pts

| wrong question |

✕   grep "WASHINGTON" Dalziel2016_data.csv | cut -d "," -f4 | **1 response**   0   / 0 pts
     sort -n | tail -1

| code looks good, "what is the maximum number of cases reported for WASHINGTON?" |

✕   grep -i washington Dalziel2016_data.csv | cut -d"," -f 4 | **1 response**   0   / 0 pts
     sort -n -r | head -n 1

| code looks good, but get into habit of using quotes around the grep pattern "what is the maximum number of cases reported for WASHINGTON?" |
